

Jefa Rudder

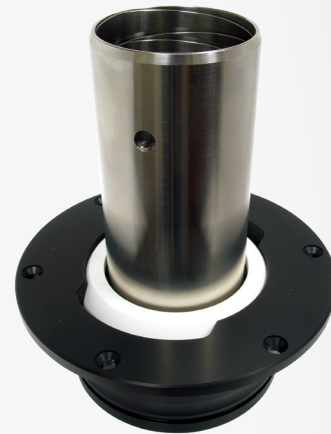

S Y S T E M S

PYI Inc. stocks rudder bearings made by Jefa Rudder Systems that are designed to replace Harken rudder bearings used in the J-105. These bearings fit with very minor modification to the boat. Please review the following information about Jefa Rudder Bearings for your J/Boat.

J-105 Upper Bearing- Part # 0642J105

Self aligning roller bearing with a mounting flange. The ball is easily removable with tools for cleaning and servicing.

- The bearing is shipped with a stainless steel replacement sleeve to bond to the rudderpost. This sleeve has holes for the upper and lower pins used in the original bearings.
- This is typically a simple remove and replace job. Some boats may require minor modification.

J-105 Lower Bearing- Part #0641J105P

With UHMW Inner and Outer Housing

Self aligning roller bearing. The ball is easily removable for cleaning and servicing.

- The bearing is shipped with a stainless steel replacement sleeve to bond to the rudderpost.
- You will need to keep the existing sealing system in place. We do offer replacement lip seals for the J105. **Part #06PURJ105**
- After the original bearing is removed, some clean up/grinding may be needed before bonding the new bearing into the boat.
- "Keep It Simple" design offers reliability, light weight, and eliminates complicated roller cages that can fatigue or corrode.
