

Four standard color options available.*

PERFECT TEXTURE

Apply over wood, fiberglass, epoxy, concrete or metal and dial in the perfect texture for your application by varying your technique.

DURABLE

KiwiGrip is a very hard acrylic polymer providing a durable, homogeneous, elastic surface. KiwiGrip will not wear through and expose filler materials.

COLOR OPTIONS

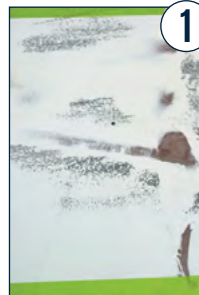

Loaded with UV stabilizer for consistent color. Available in 4 standard colors, white, cream, light gray and light blue. Custom colors are also an option. You can buy our white KiwiGrip and take it to your local paint store and have them tint it and shake it for you. Do not exceed 3% tint by volume.

NON-TOXIC

Non-toxic, no volatile solvents, very low VOC. Cleans up with soap and water.

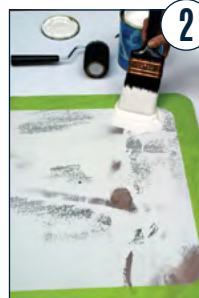

* Actual colors may vary slightly from the image above.

EASY APPLICATION

1 PREP

Simply sand the selected areas flat. Clean with de-greasing soap and mask-off the area before applying KiwiGrip.

2 APPLY

Apply and spread KiwiGrip onto the prepped surface. KiwiGrip can even be applied on top of other non-skid surfaces.

3 ROLL

Use the roller to achieve the texture you desire. For more aggressive non-skid allow coating to dry slightly then lightly roll again.

KiwiGrip

Non-Skid Deck Systems

KiwiGrip is a revolutionary, durable, non-skid coating that spreads quickly and easily with our proprietary roller, offering a beautiful, high traction surface. By varying the application technique, the texture can be adjusted from a rolled "pleasure boat" texture to an industrial aggressive grip "work boat" texture.

- WATER BASED NON-SKID COATING
- LOW-GLARE, IR REFLECTIVE FINISH
- NON-TOXIC, NO VOLATILE SOLVENTS
- EASY TO APPLY

APPLICATIONS

- PONTOON BOATS
- FISHING VESSELS
- SAILBOATS
- ALUMINUM BOATS
- STEEL BOATS
- FIBERGLASS BOATS
- WOODEN BOATS
- RESIDENTIAL DECKS & WALKWAYS
- DUCK BOATS
- DOCKS
- WORK PLACE SAFETY
- PADDLE SPORTS
- CONCRETE

As a homogeneous material, KiwiGrip doesn't suffer from the problems encountered with products filled with sand, walnut shells, beads, rubber fleck, or other fillers. Coatings with fillers tend to wear through, and the fillers fall out leaving an unsafe deck that's hard to clean and even harder to re-coat.

Superior non-slip traction for just about any application!

TESTIMONIALS

“KiwiGrip is the best invention ever and sure is a wonderful alternative to the normal non-skid do it yourselves! I've had a lot of friends and other boat owners drop by to see the deck and they are all in awe of how pretty it looks. I'm sure you'll be getting more orders from Hawaii since they all asked for your email address and I showed them the info you sent me on application. It really sells itself.”

– Sammy, Honolulu, Hawaii

“KiwiGrip was a dream to use. It is a quick, no-mess way of cleaning up tired old decks and applying a superior non-skid finish. It covered all of the spots where I have moved deck fittings and filled the unwanted holes with epoxy. They literally vanish under KiwiGrip. So far my KiwiGrip decks have endured record heat, kids, burning embers, beer, ice, snow, and sea otters without a mark. My next boat will also have KiwiGrip on the decks.”

– Brad, Nanaimo, BC
