SONIHULL

Ultrasonic Antifouling Systems

The Sonihull ultrasonic antifouling protection system uses the latest digital electronic and ultrasonic transducer technology to keep your hull cleaner.

A clean boat hull can save you up to 30% on fuel costs! We all know that fouling on boat hulls lead to increased resistance, which causes you to burn more fuel resulting in poor fuel economy.

With environmental laws getting more and more strict as time goes on it is important to have a antifouling system that is environmentally friendly. The Sonihull system does not release any metals or chemicals into water.

Protect your stern drives and SailDrives! We offer a optional Stern Drive Adaptor that bolts directly onto the your stern or SailDrive. Reports have shown up to 80% in improvement in those areas with this adaptor.

Installation is very simple with no hull penetration required. Transducers are simply bonded to the inside of your hull.

Environmentally Friendly - Does not release harmful metals and chemicals into the water

Increase Efficiency - Saves fuel when motoring & faster speeds when sailing

Cost Effective - Less frequent haul outs and cleaning

Easy to Install - No hull penetration required

TECHNICAL SPECIFICATIONS

	SONIHULL MONO	SONIHULL DUO	OCEONIC SINGLE	OCEONIC TWIN
Part #	NR-GSH-1	NR-GSH-2	NR-GOC-1	NR-GOC-2
Approvals	CE and UL	CE and UL	CE and UL	CE and UL
Voltage	100-240v AC (50-60Hz) / 12-24v DC	100-240v AC (50-60Hz) / 12-24v DC	100-240v AC (50-60Hz) / 12-24v DC	100-240v AC (50-60Hz) / 12-24v DC
Power	0.30 amps	0.70 amps	0.30 amps	0.70 amps
