

SONIHULL

Ultrasonic Antifouling Systems

Vessel: Samahani

Make: Beneteau Oceanis 37

System Installed: Sonihull Duo

Transducer Location: Near the prop shaft, and just forward of the keel

After one year with Sonihull the pictures speak for them selves. The owner stated that within the first two weeks he knew it was working as previously every two weeks he would have to clean the speed log paddle wheel. In the last year he has not had to do it once!

This boat was used for field trials for 18 months prior to the product being launched in to the Middle East at the Dubai Boat show. During this period the extensive testing carried out ensured that the product was suitable for the warmer climates that you would expect in the Middle East, Southern Mediterranean, Gold Coast and other tropics around the world.

The system has been installed for well over 2 years now with excellent results. So much so that the speed log paddle wheel has not needed cleaning since the Sonihull system was installed!

The bottom of the Beneteau Oceanis 37 is complete fouling free after two years in the water
