SOFTDOCK[®]
BY Fendertex

The Fendertex SoftDock is an inflatable dock protection system with standard or made-to-order lengths up to 30 feet. Designed to fit alongside a dock to replace traditional fenders, it can also be used for swim platforms, toys, or garage protection. The SoftDock outer shell is made of a knitted reinforced polyester and an internal polyurethane inflatable bladder giving the system excellent strength and resistance to an immense amount of pressure. Standard lengths and 3 different diameters are available to meet most docking needs or customize the length and diameter to fit your specific application.

The SoftDock Fender is attached to a dock or boat with adjustable straps and 316 stainless steel d-rings for easy installation. These rings are also fitted with cuffs that can be used to moor jet skis, tenders, or toys (when used as protection for a swim platform). Fitted with a standard inflation valve, any air pump that can reach 15 PSI can be used. Choose from 10 available colors and the optional customized or standard cover to add personalization.

VERSATILE ATTACHMENT

Adjustable attachment straps allow for flexible mounting locations on any dock. The straps can be used to moor jet skis, tenders, or toys

SOFT TEXTURE

Knitted with a soft textile that is extremely durable and UV resistant, yet does not damage paint or retain sea salts and moisture

CUSTOMIZABLE

Customize your SoftDock by having your logo, name, or design knitted in the cover. Ten different color options for the cover and customization

SPECIFICATIONS

Temperature Rating	-22°F to +266°F
Inflation Pressure	5 PSI - 15 PSI
Inflation Pump	Any pump capable of reaching 15 PSI (standard SUP pump)
Assembly / Disassembly	5 - 15 minutes with two people
